INFO

D	GB	F	ES
Bei Fahrzeugen mit lackierter Reling kann es bei Berührung mit dem Relingträger zu Scheuerspuren an der Relingoberseite kommen. Um einer Beschädigung vorzubeugen, empfehlen wir die Oberseite der Reling vor der Erstmontage an den vier Auflagepunkten der Trägerbügel (siehe Position A,B,C,D) mit einer geeigneten Schutzfolie zu versehen. Diese Schutzfolie kann kostenlos angefordert werden bei:	Vehicles with varnished factory side rails: chafing can occur on the top of factory side rails when they come into contact with the crossbar railing carriers. Before assembling for the first time and in order to prevent any damage we recommend the addition of a suitable protective film which should be attached to the top of the factory side rails at the four points supporting the crossbar railing carriers (see positions A,B,C,D). This protective film is available free of charge from:	Pour les véhicules équipés de barres de toit laquées, des traces d'usure dues au frottement avec les pieds du porte-bagages peuvent apparaître au niveau de la surface supérieure des barres. Afin de prévenir tout endommagement, nous vous recommandons de recouvrir d'un film protecteur adapté la face supérieure des barres de toit au niveau des quatre points de contact avec les pieds du porte-bagages (voir positions A, B, C et D). Ce film protecteur peut être commandé gratuitement auprès de :	En el caso de vehículos con barras metalizadas en el techo, es posible que al colocar la baca se dejen señales de roce en la parte superior de las barras. Para evitar estos daños, recomendamos colocar un film protector adecuado en los cuatro puntos donde se apoya la baca antes de montarla en la parte superior de las barras (puntos A,B,C,D). El film protector se puede solicitar gratis a:
