PRODUCT SHEET

ARTICLE NUMBER: GAT4510B

DESCRIPTION: Petrol Twin Cam Engine Setting / Locking Tool Kit

INTRODUCTION

The Fiat 1.2L 16v. engine was introduced in 1997 and the 1.4L 16v. version was released in 2003.

Various engine variants exist, as well as various procedures for timing belt replacement. The timing tools employed vary across the range and depend on the engine code.

All the 1.2L 16v. engines detailed below have the same procedure and use the same timing tools in tool kit GAT4510B.

For 1.4 16v. engines, most have the same or similar procedure but have different timing tool requirements. Those tools are also included in kit GAT4510B.

GAT4510B is a supersession of GAT4510A and GAT4513 has been replaced by GAT5052 to cover all variants of belt tensioner and newer engines.

GAT4510B covers applications in Abarth, Alfa Romeo, Chrysler, Fiat, Jeep, Lancia and Opel/Vauxhall models.
