

PRODUCT SHEET

ARTICLE NUMBER: **GAT4955B**

DESCRIPTION: **Overrunning Alternator Pulley Remover and Installer kit**

INTRODUCTION

GAT4955B is a specialised tool kit with various sockets and adaptors required to remove and install overrunning alternator pulleys of popular makes including Bosch, Denso, Magneti Marelli and Valeo found in the engine compartment of modern passenger cars and light commercial vehicles.

The tool kit contains various hexagonal sockets and adaptors required to locate, hold and remove the pulley. In addition, it also contains a female socket, a ½ Inch drive socket and a double hexagon adaptor to cover the Denso alternators. With all essential tools included for both removal and installation, this kit eliminates the need to source individual components and helps reduce service time and cost.

Tool components GAT4955-4 and GAT4956 included in **GAT4955B** are equivalent to Ford OE tool reference 414-009.
