

EUROLUB DESTILLIERTES WASSER

Description

Demineralised water.

DISTILLED WATER is demineralised using reverse osmosis and is therefore free from soluble salts; it can be used wherever pure water is required.

Distilled water is used in car batteries, car radiators, irons, humidifiers, aquariums, laboratories and many other applications.

WARNING:

DISTILLED WATER is not sterile and is therefore not suitable for use in infusions or dialysis.

Advantages:

- No residues when evaporated
- No limescale build-up in equipment
- No reaction with dissolved substances

Can be used with

VDE 0510
DIN 57 510
