

EUROLUB KÜHLERSCHUTZ ANF

Description

KÜHLERSCHUTZ ANF is an ethylene glycol-based (i.e. monoethylene glycol (MEG), ethanediol) coolant for use in both summer and winter, offering protection against frost and rust. KÜHLERSCHUTZ ANF is free from nitrites, amines and phosphates.

Thanks to its special anti-corrosion additives, KÜHLERSCHUTZ ANF is ideally suited for grey cast iron or aluminium engines; it does not foam and is neutral towards metals, rubber parts and seals. KÜHLERSCHUTZ ANF raises the boiling point and lowers the freezing point of the coolant (coolant = coolant additive + water).

KÜHLERSCHUTZ ANF should be used at a recommended concentration of 50%, achieving frost protection down to -37°C.

- Protection against corrosion, cavitation and deposits.
- Foam reduction.
- Applies to all antifreeze agents; use in combination with galvanised pipes or tanks is not recommended !!

Can be used with

BS 6580
AFNOR NF R15-601
AS 2108
ASTM D-3306
CUNA NC 956-16
SAE J 1034
UNE 26-361

Delivery

Art.-No. 820015	12 x 1,5 Liter	bottle
Art.-No. 820005	4 x 5 Liter	can
Art.-No. 820020	20 Liter	can
Art.-No. 820060	60 Liter	drum
Art.-No. 820208	208 Liter	drum
Art.-No. 820100	1.000 Liter	IBC
Art.-No. 820000	Bulk	from 27 to

Mixing table

Ratio antifreeze	amounts of water	Freeze protection to
1 parts	2 parts	-20°C
1 parts	1.5 parts	-27°C
1 parts	1 parts	-37°C
