

EUROLUB KÜHLERSCHUTZ D-65

Description

COOLANT D-65 is an ethylene glycol-based coolant. It contains a package of silicate- and OAT-based inhibitors. It is free from nitrites, amines and borates. Coolant D-65 must be diluted with water before use.

COOLANT D-65 is used when BMW LC-18 or VW TL 774-L (G12evo) is specified.

COOLANT D-65 reduces stock levels as it is compatible with both modern and older vehicles. Please refer to your owner's manual to find the correct coolant specification.

COOLANT PROTECTION D-65 can be used in BMW models from model year 1998 (LC-87) onwards.

COOLANT PROTECTION D-65 can be used in VW models (G11, G12+, G12++, G13).

As the specific application benefits of KÜHLERSCHUTZ D-65, such as good aluminium protection and longer service intervals, are only achieved when KÜHLERSCHUTZ D-65 is used on its own, mixing it with other coolants is not recommended.

Can be used with

ASTM D3306, D1384, D4340, D4985, D6210
