

EUROLUB EUROMIX 2-TAKT®

Description

EUROMIX 2-TAKT® petrol is a clean fuel that promotes a healthy working environment and a clean environment when used in forestry and gardening.

Ready-to-use special fuel blend, consisting of alkylate petrol and 2% fully synthetic two-stroke oil, benzene-free, low in aromatics and sulphur, with reduced particle and pollutant emissions to protect the environment and health.

Optimised ignition properties and efficient combustion increase engine performance and service life.

The product complies with the Swedish standard for special fuels SS 15 54 61 D, the Swiss standard SN 181163 and has been successfully tested by KWF (= 'KWF test').

- Pure and consistent refinery quality
- Healthy workplace and clean environment
- CO₂-free
- Optimal running characteristics
- Best standard values and long shelf life
- Good cold start performance

When stored correctly (in sealed containers, in a cool, dry place), the EUROMIX 2-TAKT® special fuel has a shelf life of at least 18 to 24 months without any loss of quality.

Can be used with

Environmentally friendly fuel for two-stroke engines, particularly in hand-held small appliances such as chainsaws, hedge trimmers and brush cutters.
