

Combination Rearlight Reverse Light Rear Fog Light

83830210

81670210

81695210

This series of lights is characterized by its very flat and thin design. Another advantage is that the lights can be used in both the 12V and 24V ranges and thus offer a variety of options. They are certified in accordance with protection class IP67 and therefore protected against strong water jets and temporary immersion. This means that they can also be used on boat trailers and other common trailers. These lights are always in place, even in the narrowest areas at the rear of your vehicle. We also supply a chromium cover that can be used to cover the screws so that the product also shines with visual appeal.

LED	LED	LED
		
Combination Rearlight 25,7 x 258,5 x 12 mm IP67 mounting Bolted open end 12 - 24 V with indicator (LED) with brake light (LED) with taillight (LED)	Reverse Light 25,7 x 258,5 x 12 mm IP67 mounting Bolted open end 12 - 24 V with reverse light (LED)	Rear Fog Light 25,7 x 258,5 x 12 mm IP67 mounting Bolted open end 12 - 24 V with rear fog light (LED)
